## Tenant satisfaction measures: summary of approach

### Tenant satisfaction measures

The tenant satisfaction measures (TSM) standard requires all registered providers to conduct tenant perception surveys to generate and report TSMs annually as specified by the Regulator of Social Housing. TSMs are intended to make landlords' performance more visible to tenants and help tenants hold their landlords accountable.

The TSM standards consist of 22 measures: 10 management information measures and 12 satisfaction measures. They cover five key themes: keeping properties in good repair, maintaining building safety, respectful and helpful engagement, responsible neighbourhood management, and effective handling of complaints, alongside an additional measure for overall satisfaction with landlord services. All information must be accurate, reliable and valid to provide a transparent reflection of the performance.

### Approach

IFF Research was commissioned to carry out this research in accordance with guidance provided by the Regulator of Social Housing on behalf of Local Space in 2023-24. IFF Research is an independent research agency with extensive experience in gathering robust customer feedback for a wide range of sectors.

### Survey design

The survey design meets the criteria as defined in the [tenant survey requirements](#) from the Regulator of Social Housing. Local Space also included the following additional questions within the survey:

- Why do you say that? (in the 'Overall satisfaction' section).
- Generally, how satisfied or dissatisfied are you with the way Local Space deals with repairs and maintenance? (in the 'Keeping properties in good repair' section).
- Why do you say that? (in the 'Maintaining building safety' section).
- How satisfied or dissatisfied are you that Local Space are easy to deal with? (in the 'Respectful and helpful engagement' section).
- How strongly would you agree or disagree with the following statement, "I trust Local Space to do what they say they will do"? (in the 'Respectful and helpful engagement' section).
- Have you reported antisocial behaviour to Local Space in the last 12 months? (in the 'Responsible neighbourhood management' section).
- Are you aware of the opportunities to get involved with Local Space? (in the 'Responsible neighbourhood management' section).
- Would you be interested in taking part in any of the following? (in the 'Responsible neighbourhood management' section).

A 'Don't know/refused' option was included in questions TP01, TP02, TP03, TP04, TP09 and TP10 for interviews conducted via telephone. This was not read out as an answer option and only used in instances when a customer was unable to select an option from the responses available but wanted

to continue to provide their feedback. This prevented interviewers from making assumptions or inferences on the customer's behalf and enabled these customers to continue with the survey to provide their feedback. When submitting data, any 'Don't know/refused' should be removed from the reported base for each of these questions for percentage calculations.

As a result, the TSM survey results submitted may include customers who refused or were unable to answer TP01 but wanted to continue to provide their feedback. This is in line with the introductory text confirming that their data would be included in the data submission to the regulator.

IFF has achieved 336 valid responses to TP01 for low cost rental accommodation (LCRA) which exceeds the minimum requirement for LCRA.

We consider that a respondent who has terminated an interview has effectively withdrawn their consent to participate in the research. We appreciate that this is open to interpretation, but we take the most cautious approach to uphold our ethical standards. We do include partial responses, where customers have skipped or refused to answer any questions but have submitted their interview.

## Methodology

The TSM survey was conducted monthly from 25 April 2023 to 15 March 2024.

All surveys were conducted via telephone interviews. This was to facilitate continued and comparable trends with an existing customer satisfaction programme. Telephone numbers are the most accurate contact information (with the exception of addresses) held by Local Space, so we agreed that this methodology would be most appropriate. This also aligns with what we know about the most common channel preference among customers.

## Sample size

The required sample sizes are shown in the table below (according to Local Space statistical data return 2023 and the latest population data provided by Local Space in April 2024):

Tenure type	Population	Confidence interval required	Number of interviews required per annum for submission	Number of interviews completed
Low cost rental accommodation (LCRA)	1350	+/- 5%	299	336
<b>Total</b>	1350		229	336

Local Space is required to complete a minimum of 299 surveys per annum among LCRA customers to meet a +/-5% confidence interval.

We used a quota sampling approach based on agreed characteristics to represent the profile of the full customer population. Quotas were set for stock type.

### Representative sample

The regulator requires providers to ensure, as far as possible, that the survey responses used to calculate the perception TSMs are representative of the relevant tenant population. The sample needs to be representative, otherwise perception measures will be biased estimates of the satisfaction score for the relevant tenant population. Providers can meet this requirement through one of two routes:

1. A representative sample: this means there is no material under- or over-representation of tenant groups (compared to the relevant tenant population) that is likely to affect calculated satisfaction scores.
2. Weighting responses: if the achieved sample is not representative of the tenant population, then providers must appropriately weight the responses to ensure the TSMs reported are representative. Providers must reach a balanced judgement as to which characteristics to include in an assessment of representativeness based on their particular tenant profile, evidence or rationale for potential different satisfaction scores by characteristic, and available data.

### Survey profile review

Our survey profile review summarises the representativeness of the survey results and compares the demographic profile of customers who completed the TSM survey in 2023-24 and the Local Space demographic profile (as provided in April 2024). The demographic profile of customers completing the survey reflects the overall population profile of Local Space customer base.

Based on the survey profile review, we are satisfied that the sample population and TSM results accurately reflect the full customer population.

	<b>Population (statistical data return 2023)</b>	<b>Minimum survey sample size (based on statistical data return 2023) required for TSM submission</b>	<b>Final achieved counts for submission 2023-24 (LCRA)</b>	<b>Valid base for Q1 ('Don't know' responses removed)</b>
Low cost rental accommodation (LCRA)	1350	299	338	336

LCRA population – age			Final achieved counts for submission 2023-24 (LCRA)	
Age	Count	%	Count	%
0-15	1	0%	0	0%
